

Instructional Strategies: Functional Routines

1. Complete the Student Learning Profile (SLP) assessment to determine the skills to teach across all curriculum areas. The assessment will identify lessons to teach using the three strategies of discrete trial, pivotal response training and functional routines. Remember that it is not necessary to explicitly “test” each assessment item. You may also complete the assessment based on observations around the school and classroom. The point of the assessment, initially, is to guide the selection of appropriate lessons. Use the Program Guide to track lessons.
2. Based upon the results of that assessment, identify appropriate Functional Routine lessons for instruction. Consider choosing 2-3 routines on which to focus for each student.

Lesson 1: Arrival

Objective: Given adult supervision and simple verbal directions, student will greet adult, walk with adult without holding hands, open door and enter classroom, go to correct location and put belongings away, and go to daily activity schedule, completing at least 90% of steps in arrival routine without prompts on 2 consecutive weekly observations.

Lesson Plan

Case	Response	See Also
1. Vehicle arrives. Adult greets student and says, "Home!"	Student looks at adult.	Level I, Receptive Language [PRT], Lesson 1
2. Adult says, "Hi"	Student looks at adult and communicates "Hi" by _____.	Level I, Expressive Language [PRT], Lesson 1 and 2
3. Adult waves hand to student.	Student waves hand.	Level I, Receptive Language [PRT], Lesson 4
4. Adult says, "Walk with me!" (Collect data on 3 trials.)	Student walks within 2 feet of adult, without holding hands, for _____ feet.	Level I, Receptive Language [PRT], Lesson 3
5. At classroom door, adult moves behind student.	Student opens classroom door and enters.	
6. Cubbyhole, basket, or locker is marked with student's name and picture.	Student goes to cubbyhole, basket, or locker.	
7. Student locates hook or other designated place to put away backpack and coat.	Student takes off backpack and coat and puts them down in correct place.	
8. After student puts belongings away, he or she sees consistent location for daily activity schedule.	Student goes to daily activity schedule and begins transition routine.	

Skills for Incidental Teaching

Case	Response	See Also
1. Another adult or student says, "Hi"	Response: Student looks at adult or other student and communicates "Hi" by _____.	See Also: Level I, Expressive Language [PRT], Lesson 1 and 2
2. Another adult or student waves at student.	Response: Student waves at other adult or student.	See Also: Level I, Receptive Language [PRT], Lesson 4
3. Student is having difficulty talking or is having lip-licking or coat.	Response: Student looks at adult and communicates need for help to adult by _____.	See Also: Level I, Expressive Language [PRT], Lesson 3
4. Adult says, "Hi, me!"	Response: Student looks toward adult.	See Also: Level I, Receptive Language [PRT], Lesson 1
5. Adult says, "Come here"	Response: Student comes _____ feet, to within 2 feet of adult.	See Also: Level I, Receptive Language [PRT], Lesson 1

Examples of Supports and Adaptations to Support Participation

Reinforcement for Good Attempts: Reinforce when step is performed more independently (i.e., with prompts for some, rather than for all, or steps or with better quality (e.g., more specific, longer, with better clarity). Choose least intrusive and most natural forms of reinforcement that will be effective.

Environmental Arrangement: Space, Visual Supports, Materials, and Time

- Provide student a cubbyhole, basket, or locker, clearly marked with name and photograph of student, in arrival area.
- Provide a non-checkboxed pointed area student's cubbyhole, basket, or locker, showing steps in arrival routine.
- Arrange student's daily activity schedule, clearly marked with student's name and photograph, in a visible location, near arrival area.

Supports for Choice Making, Communication, Social Interaction, and Problem Solving:

- Prepare adults and students who are likely to encounter student during this routine to greet student by saying student's name and "Hi" or "Hi!" and to wave to student.

Steps with Goals to Specify Student's Response:

1. Specify what action or with what words student communicates "Hi!"
2. Identify expected distance for independence on this step based on current performance in discrete trial training boxes for this skill (Level I, Receptive Language, Lesson 3; Receptive Actions on a Walk). Use shaping to begin at a successful level for student, and gradually increase to desired distance (for more information on shaping, see TCRB Program Manual, Chapter 9).

3. Copy the routine forms (data sheets / task analysis) from the Blackline Masters book for the selected lessons.

Level I, FR, Lesson 1: Arrival

Student: _____ Date started: _____

Settings: _____ Date mastered: _____

Case	Response	Date				
		1	2	3	4	5
1. Vehicle arrives. Adult greets student and says, "Home!"	Student looks at adult.					
2. Adult says, "Hi"	Student looks at adult and communicates "Hi" by _____.					
3. Adult waves hand to student.	Student waves hand.					
4. Adult says, "Walk with me!" (Collect data on 3 trials.)	Student walks within 2 feet of adult, without holding hands, for _____ feet.					
5. At classroom door, adult moves behind student.	Student opens classroom door and enters.					
6. Cubbyhole, basket, or locker is marked with student's name and picture.	Student goes to cubbyhole, basket, or locker.					
7. Student locates hook or other designated place to put away backpack and coat.	Student takes off backpack and coat and puts them down in the correct place.					
8. After student puts belongings away, adult opens student's classroom schedule, and he or she sees consistent location for daily activity schedule.	When adult opens student's classroom schedule, student can go to daily activity schedule and begins transition routine.					
Summary Scores	Number of Steps Scored					
% of Independence	Number of 0s : Number of Steps Scored x 100					
Average Independence	Sum of Steps Scored : Number of Steps Scored					

3. Take baseline data on the routines using the routine form. Observe the routine one time to determine the baseline scores. Functional Routines use an Independence Measurement Scale:
 - a. 4 = No added prompts (independent)
 - b. 3 = Verbal or gesture prompts
 - c. 2 = Physical prompt for part
 - d. 1 = Physical prompt for all or most
 - e. 0 = No response
 - f. N/A = Not applicable

4. Based upon the baseline scores, determine what pre-teaching (DT, PRT, communication systems, etc.), during routine teaching instruction (prompting/fading, reinforcement, and data), and environmental supports (room arrangement, task strips, visual schedules, timers, etc.) need to be implemented.

5. Implement routine daily. Take data only once per week on each routine.

Level I, FR, Lesson 1: Arrival

Student: _____ Date started: _____

Settings: _____ Date mastered: _____

		Date						
Goal	Response	Scores						
1. Within 10 seconds, adult meets student and says, "Name"	Student looks at adult.							
2. Adult says, "Hi"	Student looks at adult and communicates "Hi" by _____.							
3. Adult waves hand to student.	Student waves hand.							
4. Adult says, "Walk with me" (distribute average scale for 3 trials.)	Student walks within 2 feet of adult, with hand touching hand, for _____ feet.							
5. At classroom door, adult waves behind student.	Student opens classroom door and enters.							
6. Classroom teacher or teacher in assistant with student's name and picture.	Student goes to cubbyhole, hook, or locker.							
7. Student locates hook or shelf designated place to put away backpack and coat.	Student takes off backpack and coat and puts them there in the designated place.							
8. After student puts belongings away, adult gives student a transition signal, and he or she goes to next location for daily activity schedule.	When adult gives transition transition signal, student refers to the daily activity schedule and begins stated time routine.							
Summary Scores	Number of Steps Scaled							
% of Independence	Number of No. : Number of Steps Scaled x 100							
Average Independence	Sum of Steps Scaled : Number of Steps Scaled							

6. Use data to make adjustments to pre-teaching, during routine instruction, and environmental supports, and to determine what skills need to be taught.
