STAR Workshop Content

The instructional methods of discrete trial training, pivotal response training, teaching functional routines, and positive behavior interventions and supports form the instructional base of this comprehensive program. Participants receive examples of STAR Program lesson plans at each instructional level in order to practice their skills in implementing the program.

- ★ Learn the STAR Program's (Arick, Loos, Falco, Krug, 2004) curriculum content
- ★ Watch video and demonstrations of the three instructional methods in the STAR Program

What You Will Learn

- ★ Developmental curriculum content appropriate for students with ASD and other developmental disabilities
- ★ Curriculum-based assessment techniques for baseline and progress monitoring
- ★ To use Applied Behavior Analysis (ABA) to teach new skills
- ★ To teach students with ASD to be independent and to generalize skills within their daily routines

What You Will Receive

- ★ Extensive handouts
- ★ One STAR Program student assessment at each level
- ★ Continental breakfast and a light snack
- ★ A certificate for 12 hours continuing education credit

Links Workshop Content

The workshop will focus on using evidence-based strategies to teach students critical skills across developmental areas. These strategies include:

discrete trial training, visual and environmental supports, task-analysis and positive behavior supports. Participants will learn to apply teaching strategies to lesson plans and functional routines, complete assessments, and monitor progress based on the data collected during instruction. Practice activities focus on individualizing the curriculum for each participant's situation. Participants will watch video and demonstrations of the curriculum, and receive examples of the curriculum.

What You Will Learn

- Comprehensive curriculum for teaching the skills needed to be successful in school and community activities
- To assess and take baseline data to determine skill levels for instruction and the generalization of skills during routines
- To use Applied Behavior Analysis (ABA) to teach new skills and functional routines
- Process for tracking student progress and generating reports for data-based decision making
- How to collaborate with others and share data to develop a comprehensive, individualized educational program

What You Will Receive

- Extensive handouts
- Links Curriculum Manual and student assessment
- Continental breakfast and a light snack
- A certificate for 6 hours continuing education credit
- 10% discount on all Links subscriptions
- A free 6-week subscription (includes access to: all lesson plans, school and community routines, the full on-line system)
